## Ti-TG7 & TG9 Long Life Battery

The TG7 & TG9 is a unique product with typically 3/5 years battery lifetime based on 2 positions/day. The robust casing is suited for all industrial environments and all-weather conditions with an operating temperature range from -20°C to +85°C.

These devices provide global connectivity to any asset, both powered and non-powered equipment. It is primarily designed for heavy industries like transport and logistics, construction, rental, and theft security.
