

# MAKING IT SIMPLE

Overview of online Control panel

## SHOW DMC

Show Device Management Console (DMC) allows you to view all of your trackers easily on one screen.

## ZONES

By adding a zone up to 3 people can be alerted when a tracker enters or leaves a monitored area.

The Trackit247 devices are small powerful mini live tracking GPS units.

Track vehicles, people & assets

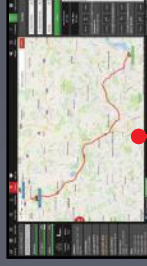

## SHOW TRAFFIC

Show traffic allows you to see a live update on the traffic on the main roads near your trackers.

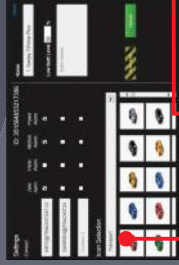

## ROUTING

Routing allows you to see the quickest route from a tracker to another tracker or post code.

## SETTINGS

The settings screen allows you to change the appearance and name of the trackers and set the alert contacts.

## HISTORY VIEW

The history view will show you up to 12 months of tracking history. Which you can download into an excel spread sheet or pdf file.

## COMMANDS

You can easily change the frequency of tracking from the commands menu & reboot your device remotely.

## ONSCREEN ALERTS

Zone and motion onscreen alerts keep you informed of your trackers movements.

Easy to use & implement web based control panel

Track your device LIVE 24/7 from your PC or mobile

Check Tracker route, Speed, Mileage, History

Advanced features include motion alerts, geo fence zones, live traffic, routing & DMC
